

Master of Science Program in Secondary Education of Students who are Deaf or Hard of Hearing

Content Area/Certification Questionnaire

As stated in the RIT Graduate Catalog, you are required to show evidence that you have completed 30 semester credit hours in a content area to teach at the secondary level. MSSE students who do not have the required number of hours must complete the additional credits before applying for the New York State initial teacher certification. The additional credits can be earned during the time students are in the MSSE program. Please note that such content course grades will be counted as part of the graduate program GPA. We encourage you to apply for the program even if you do not have the required credits in the content area. If necessary, you will have to take both the content courses and the MSSE courses simultaneously.
